

# Paragon Transportation, LLC

## AVIATION DIVISION

Paragon Transportation, LLC, Aviation Division was founded for the purpose of assisting airframe manufacturers, avionics equipment suppliers, and other aircraft related organizations in both product development and in dealing with the complex issues of certifying avionics systems and equipment. Paragon is experienced in providing guidance to the aviation community to achieve aircraft and equipment certification on schedule and at a minimum cost.

Paragon employs Designated Engineering Representatives (DERs) for the Federal Aviation Administration. In this capacity, we are able to approve or recommend the approval of:

- FAA certification program management
- Aircraft major alterations
- Aircraft equipment installation
- Aircraft avionics equipment
- Safety analysis
- Software development documentation
- Ground and flight test procedures
- All other data needed for type certification

All engineering aspects can be handled for these programs. Design of complex avionics installations, mechanical modifications, kit production, and installation on contract can be arranged.

The enclosed brochure provides a more detailed description of Paragon's capabilities and current projects. We will be pleased to meet with you for discussions in order to determine how Paragon can be of assistance to your organization in its engineering and certification efforts.
